

App. No. 10/708,599

REMARKS - General

By the above amendment, Applicants have amended the title to emphasize the novelty of the invention.

The applicant has modified the claims to focus on the unexpected results of the current invention. The applicant believes this to be novel and unique over Kay (4,188,409), Gianfranco (5,582,731) and all other referenced prior art.

Also applicants have rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art.

Conclusion

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

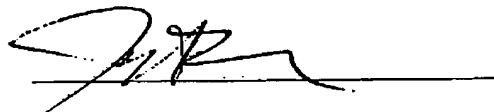

Respectfully submitted,
